

Reverse Logistics and Compliant Disposition

[Reverse Logistics Presentation of Capabilities – View and Download](#)

Products that are removed from the market enter the WDSrx Pharmaceutical Reverse Logistics department.

Reverse Logistics involves receiving drug products that cannot be used and returning them to the manufacturer or selecting them for Regulatory Compliant Product Disposition.

PHARMACEUTICAL REVERSE LOGISTICS

Extreme accuracy and precise record-keeping are of vital importance as pharmaceutical drug products are received, sorted, packaged and returned to their point of origin. Where possible, additional steps are required to assure credit is provided and properly applied to client accounts.

PRODUCT DISPOSITION

Regulatory Compliant Product Disposition is a specialized, highly regulated service ensuring that prescription medications are destroyed according to strict guidelines.

WDSrx is licensed by the State of Florida Department of Business and Professional Regulation and the U.S. Drug Enforcement Agency (DEA) for this purpose. These procedures are designed to minimize environmental impact and to make sure that potentially dangerous drugs cannot re-enter the marketplace.

REVERSE DISTRIBUTION CHANNELS

Returns of medications for credit or destruction generally originate from three sources. managed independently or as part of Managed Service Organizations (MSO) utilize the WDSrx online Returns Center to streamline the returns process in two easy steps: first create an online inventory and then ship the package with the courier label that prints from any printer. The Reverse Logistics department acts as an agent for that rely on WDSrx to oversee the entire returns process, creating and administering a comprehensive program for returns from all sources according to client policies.

are large volume orders from distributors or manufacturer warehouses due to outdated product, recalls, withdrawals, damages or other circumstances affecting product integrity.

PROGRAM BENEFITS

Benefits to the client of an ongoing Pharmaceutical Reverse Logistics program include maintaining compliance with FDA and DEA regulations, contributing to reducing diversion of pharmaceutical drug products and demonstrating a corporate commitment to environmentally sustainable and responsible solutions for pharmaceutical waste.

Reverse Logistics programs at WDSrx also provide peace-of-mind for clients who appreciate that the entire process is administered by WDSrx professionals. Comprehensive pharmaceutical reverse logistics services include initial product receipt and waste classification through Return Authorization and Validation, lot and serial number traceability and issue of credit or Certificate of Destruction.

WDSrx contracts with pharmacies, healthcare providers, hospitals and purchasing organizations for Reverse Logistics services and for Regulatory Compliant Product Disposition.
