

Transportation Management

3PL Pharmaceutical Distribution – Transportation Management

Patient welfare is a priority at WDSrx. That means providing the most efficient and safest supply chain solutions to deliver pharmaceutical drug products to their final destination. Our commitment requires specialized expertise in life sciences transportation management.

Operating in the largest pharmaceutical marketplace in the world, WDSrx manages transportation requirements by road, by sea, by rail and by air for products originating domestically and internationally as they make their way along the supply chain through WDSrx 3PL pharmaceutical distribution facilities and on to their final destinations.

Point-To-Point Supervision

Experienced customs brokers authorized by WDSrx meet international shipments on the dock or at the airport to minimize delay and streamline the delivery of valuable pharmaceuticals from point of entry to WDSrx. To facilitate client transportation needs around the world, WDSrx is licensed by the Federal Drug Enforcement Agency as an Importer authorizing permitting of international shipments of Controlled Substances (Schedules CII-CV) into the United States.

Cost Control

WDSrx is an independent pharmaceutical 3PL enabling our transportation management department to search among several preferred freight transportation companies and present the best solution to clients considering safety, efficiency and cost. Our significant shipping volume with carriers qualifies us for

significant discounts and upgrades that benefit clients.

Concierge Service

The transportation management team works closely with clients to address their total shipping and receiving requirements including adhering to pick-up and delivery windows, completion and generation of all documentation, temperature and security monitoring, GPS location services, insurance and claims, real-time delivery receipt confirmations and intervention assistance according to client Standard Operating Procedures.

Strategic Locations

With facilities located in Boca Raton, FL and in Sugar Land TX, WDSrx is well positioned with direct access to many of the country's busiest pharmaceutical transport hubs including Miami International Airport (MIA), PortMiami and Port Everglades. Our facility in Sugar Land, TX links with the Port of Houston and George Bush International Airport. Shipments from our 3PL Pharmaceutical Distribution Centers reach destinations throughout the United States with minimal outgoing weather-related delay.
