

Quality Assurance and Regulatory Compliance

WDSrx maintains Pharmaceutical 3PL compliance with and is licensed by governmental and other authorities to minimize the element of risk in our operations. Risk Management and Compliance professionals rely on WDSrx to place the highest priority on regulatory issues. Compliance affects every aspect of our day-to-day business including the following areas:

Warehousing and Distribution – . Promoting the safe and efficient delivery of pharmaceutical drug products to benefit patient health.

Temperature Regulated Environments – . Consistency of temperature to the highest degree within the pharmaceutical supply chain.

Reverse Logistics Disposition – . Environmentally responsible procedures to reduce product deviation.

Regulatory Compliance and Industry Participation – . Industry-leading procedures to mitigate supply chain risk and maintain regulatory compliance.
