

Packaging and Shipping Guidelines

- Bottles of liquids should be sealed and put into a plastic bag and then packed with some type of soft packaging material to avoid breakage. WDSrx is not responsible for loss of credits for products that break during transit.
- Do not stuff partially filled bottles with cotton or tissue.
- Make sure all bottle caps are securely fastened to prevent spillage and leakage.
- Controlled substances (CII's) may only be shipped upon receiving a DEA Form 222.
- Controlled substances (CII-CV) may be shipped in the same box as your non-controlled drugs.
- Do not ship a box weighing over 50 lbs.
