

## WDSrx Featured As Life Sciences South Florida Industry Spotlight

WDSrx, a company providing healthcare supply chain solutions, is part of a vibrant and growing life sciences hub in South Florida.

Our leadership lends their expertise to the Logistics Industry Task Force of the Business Development Board of Palm Beach County ([www.bdb.org](http://www.bdb.org)) and sits on the Business Partnership Council at Palm Beach State College. We are active members of [BioFlorida](#), the largest organization in Florida promoting the biopharmaceutical industry.

As part of WDSrx outreach activities to support the regional life sciences community, a breakfast networking event and facility tour was organized at WDSrx headquarters in Boca Raton, FL in May. The program was co-hosted by WDSrx, the Business Development Board of Palm Beach County and Life Sciences South Florida.

Life Sciences South Florida (LSSF) is a consortium of institutions, including universities, colleges, economic development agencies, research institutes and industry for whom the life sciences are a key part of their focus. The program is managed by the Office Of Engagement at Florida International University in Miami, FL.

Life Science South Florida featured WDSrx in their Industry Spotlight newsletter this July. Read the article [here](#).

Their interest in WDSrx demonstrates the collaboration between industry and academia that makes South

Florida a uniquely cooperative and encouraging environment for life science companies at every stage of development.

For further information about LSSF contact James Knapp at [JKnapp@fiu.edu](mailto:JKnapp@fiu.edu).
