

WDSrx Dayton, NJ Facility Receives VAWD Accreditation

March 3, 2019, Dayton, NJ — The National Association of Boards of Pharmacy (NABP), a national organization of State Boards of Pharmacy that helps ensure public health and safety, approved VAWD accreditation for the WDSrx facility in Dayton, NJ, which became operational in January, 2018.

“We are pleased to announce VAWD accreditation for our Dayton, New Jersey location,” states WDSrx President Adam Runsdorf. “We understand that VAWD standards demand the highest level of professionalism and accountability. This recognition is an accurate reflection of our team’s value to our clients and to patients.”

The Verified-Accredited Wholesale Distributors (VAWD) accreditation involves a thorough evaluation and analysis of operations and procedures to maintain public health and safety. WDSrx facilities with VAWD accreditation in Florida, New Jersey and Texas undergo annual NABP compliance reviews and on-site surveys once every three (3) years to ensure the integrity of the designation.

VAWD-recognized facilities play an important role in preventing counterfeit drugs from entering the United

States pharmaceutical supply chain and protecting the public from contaminated and diverted products. Pharmaceutical manufacturers and many State regulatory authorities recognize that VAWD accreditation helps ensure that the wholesale distribution facility operates legitimately, is licensed in good standing and employs security and best practices for distribution.

WDSrx provides third party logistics services exclusively to the Life Sciences industry.
